In today’s anatomic pathology (AP) lab, molecular testing plays an increasingly important role in informing treatment decisions and prognoses. With Sunquest’s integrated reporting capabilities for AP and molecular testing, Sunquest PowerPath® and Sunquest CoPathPlus™ connect with Sunquest Mitogen™ LIMS to provide pathologists and oncologists with a meaningful, actionable report.

Review AP and molecular test results in one combined report for more coordinated, efficient care.
Benefit clinically from combined resulting

- Gain clearer diagnostic, prognostic, and treatment-related insights with AP and molecular test results integrated into one clinically-actionable patient report
- Engage in faster, more informed decision-making by viewing disparate, inter-disciplinary data in one place
- Gain a more holistic view of your patients with complementary results, including critical values, side-by-side

Improve care coordination

- Position the pathologist at the center of communication on critical patient information
- Facilitate communication and collaboration across molecular, AP, and internal departments
- Support knowledge transfer and dialogue between pathologists and oncologists

Work more seamlessly with systems integration

- Bring the power of molecular testing, supported by Sunquest Mitogen LIMS, into your anatomic pathology workflow
- Send integrated AP and molecular test reports directly to the EHR
- Execute on interoperability and connectivity using the FHIR industry standard

AP/Molecular Workflow

About Sunquest • The One delivering labs to new heights

Sunquest Information Systems Inc. provides diagnostic informatics solutions to laboratories worldwide. With our wide-ranging technical and cross-discipline expertise, and equally deep business acumen, no one is better equipped than Sunquest to transform your lab to meet today’s complex healthcare challenges and deliver next-level performance. Since 1979, Sunquest has helped laboratories and healthcare organizations enhance efficiency, improve patient care, and optimize financial results. Our capabilities include multi-site, multi-disciplinary support for complex anatomic, molecular and genetic testing, and support engagement with physicians and patients outside the hospitals at the point-of-care. Sunquest also provides solutions for public health organizations, in the form of disease surveillance and outbreak management, to promote public health wellness worldwide. Headquartered in Tucson, AZ with additional offices in Calabasas, CA and India, Sunquest is a global leader in healthcare information technology. For more information, visit www.sunquestinfo.com.
